# Latch Link Plaque Installation Instructions

Internal Installation

Mount the plaque to the interior wall using the 3M Secure Strips.

1. Confirm the surface you plan to mount the plaque onto is free of dust or lint and is sufficiently flat to ensure good adhesion.

2. Peel the backing from the 3M strips.

3. Position the plaque in your desired position and press firmly against the wall for a minimum of 30 seconds to ensure strong adhesion. We recommend placing it in a highly visible area next to the corresponding door and Latch T or R reader.

External Installation

Mount the plaque to the exterior wall using the 3M Secure Strips as well as an appropriate silicone adhesive for your wall material (not included in box).

1. Confirm the surface you plan to mount the plaque onto is free of dust or lint and is sufficiently flat to ensure good adhesion.

2. On the rear of the plaque, apply a thin bead of construction adhesive to the entire backside of the plaque, making sure to get close to the edge.

3. Peel the backing from the 3M strips.

4. Position the plaque in your desired position and press firmly against the wall for a minimum of 30 seconds to ensure strong adhesion. We recommend placing it in a highly visible area next to the corresponding door and Latch T or R reader.

5. If necessary, apply a final bead of silicone around the edge, making sure not to block the slot where the QR code card is inserted.

6. Wipe with a damp cloth to smooth the edge.

7. Once dry, remove any excess silicone from the front of the plaque using a rag.
